

**Montana Board of Oil and Gas Conservation
Environmental Assessment**

Operator: Rosetta Resources Operating LP
Well Name/Number: Glacier Farms 3207-22-12
Location: NW SW Section 22 T32N R7W
County: Glacier, **MT;** **Field (or Wildcat)** W/C

Air Quality

(possible concerns)

Long drilling time: 10 to 15 days drilling time.

Unusually deep drilling (high horsepower rig): No, super single or small triple derrick drilling rig for a 5500' TD vertical hole, Souris River Formation test well.

Possible H2S gas production: Yes, H2S gas production possible.

In/near Class I air quality area: Yes, Class I air quality area, Blackfeet Reservation.

Air quality permit for flaring/venting (if productive): Yes, DEQ air quality permit required under 75-2-211.

Mitigation:

☒ Air quality permit (AQB review)

☐ Gas plants/pipelines available for sour gas

☐ Special equipment/procedures requirements

☐ Other: _____

Comments: Super single or triple derrick drilling rig to drill a vertical test hole to 5500' TD, a Souris River Formation test well.

Water Quality

(possible concerns)

Salt/oil based mud: Use freshwater and freshwater mud system on surface and main hole.

High water table: None anticipated.

Surface drainage leads to live water: No, closest drainages are unnamed ephemeral tributary drainage to Two Medicine River, about 1/8 of a mile to the northwest and 1/4 of a mile to the south southeast from this location. Two Medicine River is about 3.5 miles to the southwest of this location. The unnamed ephemeral drainage to the south southeast has a stock pond in the drainage.

Water well contamination: No, closest water wells are about 1 mile and further from this location. Surface casing hole will be drilled with freshwater and freshwater muds to 500' and steel surface casing run and cemented to surface to protect ground water.

Porous/permeable soils: No, sandy clay soils.

Class I stream drainage: Class I stream drainage is Two Medicine River, about 3.5 miles to the southwest from this location.

Mitigation:

☒ Lined reserve pit

☒ Adequate surface casing

☐ Berms/dykes, re-routed drainage

☐ Closed mud system

☐ Off-site disposal of solids/liquids (in approved facility)

☐ Other: _____

Comments: 500' of surface casing cemented to surface adequate to protect freshwater zones. Also, fresh water mud systems to be used on surface hole.

Soils/Vegetation/Land Use

(possible concerns)

Stream crossings: None anticipated.

High erosion potential: No, moderate cut, up to 13.6' and no fill required up to 0.0', required.

Loss of soil productivity: No, location will be restored after drilling, if nonproductive. If productive unused portion of drillsite will be reclaimed.

Unusually large wellsite: No, large, 350'X300' location size required.

Damage to improvements: Slight, surface use is an cultivated field.

Conflict with existing land use/values: Slight

Mitigation

☐ Avoid improvements (topographic tolerance)

☐ Exception location requested

☒ Stockpile topsoil

☐ Stream Crossing Permit (other agency review)

☒ Reclaim unused part of wellsite if productive

☐ Special construction methods to enhance reclamation

☐ Other _____

Comments: Using existing county road, Lenoir Road. Rosetta will construct about 800' of new access road into this location from the county road. Cuttings will be buried in the lined reserve pit. Drilling fluids and completion fluids will be trucked to a Class II disposal well. Pit will be allowed to dry then backfilled when dry. No special concerns

Health Hazards/Noise

(possible concerns)

Proximity to public facilities/residences: Closest residences are further than 1 mile from this wellsite.

Possibility of H2S: Yes possible H2S.

Size of rig/length of drilling time: Super Single or triple derrick drilling rig 10 to 15 days drilling time.

Mitigation:

☒ Proper BOP equipment

☐ Topographic sound barriers

☒ H2S contingency and/or evacuation plan

☐ Special equipment/procedures requirements

☐ Other: _____

Comments: No concerns, proper BOP stack and adequate surface casing should be able to control any problems that occur.

Wildlife/recreation

(possible concerns)

Proximity to sensitive wildlife areas (DFWP identified): None, identified

Proximity to recreation sites: None identified.

Creation of new access to wildlife habitat: No

Conflict with game range/refuge management: No

Threatened or endangered Species: Species identified as threatened or endanger in Glacier County are Grizzly Bear, Canada Lynx, Gray Wolf and Bull Trout.

Mitigation:

☐ Avoidance (topographic tolerance/exception)

☐ Other agency review (DFWP, federal agencies, DSL)

☐ Screening/fencing of pits, drillsite

☒ Other: Remove garbage daily. All empty mud sacks need to be stored in an enclosed trailer.

Comments: Private cultivated surface lands. Drilling of this well should not impact any of species listed above. Bull Trout do not exist in Two Medicine Creek drainage. Grizzly Bears, Gray Wolf and Canada Lynx are not established in this area. NH tracker website 0 species of concern for T32N R7W. No concerns.

Historical/Cultural/Paleontological

(possible concerns)

Proximity to known sites None identified

Mitigation

☐ avoidance (topographic tolerance, location exception)

☐ other agency review (SHPO, DSL, federal agencies)

☐ Other: _____

Comments: Private cultivated surface lands. No concerns.

Social/Economic

(possible concerns)

☐ Substantial effect on tax base

☐ Create demand for new governmental services

☐ Population increase or relocation

Comments: Wildcat well. If production is established then these issues will be addressed based on the size of the discovery. If a dryhole no social/economic impact will occur. No concerns

Remarks or Special Concerns for this site

Well is a vertical Souis River Formation test to 5500' TD.

Summary: Evaluation of Impacts and Cumulative effects

No long term impacts expected. Some short term impacts will occur.

I conclude that the approval of the subject Notice of Intent to Drill (does/**does not**) constitute a major action of state government significantly affecting the quality of the human environment, and (does/**does not**) require the preparation of an environmental impact statement.
